

Changing the Default Printer in Windows 11

Click on the **start menu** and type “**Printers**”. Click on the **Printers & scanners** option.

A window will appear showing you all the printers that have been setup on your computer.

Scroll down to the Printer preferences section and make sure the **Let Windows manage my default printer** is **turned off**.

Now back up in the list of printers click on the printer you want to make your default printer and click on the **Set as default** button to make that your default printer.
