Description

Setting a published page as the homepage for your SharePoint site.

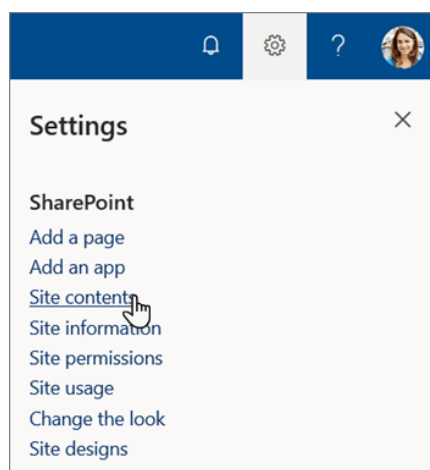

Resolution

Changing the SharePoint Site Homepage

Notes:

- You must be the **site owner** to set a different page as a homepage.
- The page you use as a homepage must be stored in the **Pages** (or **Site Pages**) library of your site and must not be **checked out** and must be **published**.

1. Navigate to the **Site Pages library** of your site by selecting **Settings**  then **Site Contents**.

2. On the Site contents page, select **Site pages**.
3. From the **Site pages** library, find the page you want to make a homepage, and select the circular option button to the left of the page title.

Details

If you don't see the menu options such as the **Make Homepage** option, you may be viewing your pages library in the **Classic Experience**. To see these options, switch your document library to the **New Experience** using the steps below.

Troubleshooting

Change the experience for a list or document library

- 1. From a **list**, select **List settings**, then select **Advanced settings**.
- 2. From a **library**, select **Library settings**, select **More library settings**, then select **Advanced settings**.
- 3. Scroll down to **List experience** and select one of the three experience options.
- 4. To save your selection, select **OK**.
